

HUU TIN TO

Ho Chi Minh City, Vietnam • sooyoshin@gmail.com • (+84) 97-467-2543

Communication researcher with a Master of Arts in Cultural Communication and Design from I-Shou University. My research focuses on AI influencer marketing, consumer behavior, and digital communication. Specifically, I am interested in examining how AI influencer characteristics (e.g., trustworthiness, anthropomorphism, and trendiness) influence brand loyalty, with perceived authenticity serving as the underlying mechanism and AI disclosure acting as a boundary condition. My master's thesis investigated the effects of brand ambassador characteristics on consumers' purchase intentions, which inspired my current research on AI-enabled marketing and consumer-brand relationships.
